Chance imbalances under valid randomization
Each panel is one random allocation; pre−treatment T−C gaps (.) differ by chance.
Control
Treatment
Randomization 1 − .(T−C)=2.6
Randomization 2 − .(T−C)=1.5
Randomization 3 − .(T−C)=5.1
Randomization 4 − .(T−C)=−4.9
Randomization 5 − .(T−C)=−3.7
